

# ORNILUX® BIRD-SAFE GLASS FOR BALUSTRADE APPLICATIONS

ORNILUX® glass with Supermikado (UV) coatings and Design Dots (chrome-based markings) offers modern, certified solutions for balustrades and railings, effectively preventing bird collisions with glass. Supermikado remains nearly invisible to the human eye, preserving the aesthetics of the façade, while Design Dots provide a visible contrast in both reflection and light transmission.

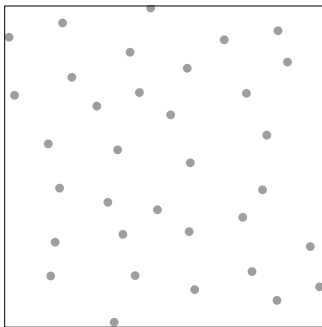

**SUPER MIKADO**

## ORNILUX® SUPER MIKADO SIZE LIMITATIONS

Maximum glass dimensions: 4950 × 2550 mm

**DOTS**

## ORNILUX® DESIGN DOTS SIZE LIMITATIONS

Maximum glass dimensions: 4950 × 2550 mm

## ORNILUX® Super Mikado & Design Dots glass configuration
